

Draft of the forthcoming revision of U.S. Department of Agriculture, Agriculture Handbook 66

The Commercial Storage of Fruits, Vegetables, and Florist and Nursery Stocks

This draft has been assembled from information prepared by authors from around the world. It has been submitted for editing and production by the USDA Agricultural Research Service Information Staff and should be cited as an electronic draft of a forthcoming publication (see suggested citation below). Because the 1986 edition is out of print, because we have added much new and updated information, and because the time to publication for so massive a project is still many months away, we are making this draft widely available for comment from industry stakeholders, as well as university research, teaching and extension staff. Your feedback is welcome. Address it to:

Dr. Kenneth C. Gross
USDA/ARS, Building 002
Produce Quality and Safety Laboratory
Plant Sciences Institute
Henry A. Wallace Agricultural Research Center
10300 Baltimore Avenue
Beltsville, MD 20705-2350
hb66@ba.ars.usda.gov

All information in the draft has been peer-reviewed and edited for scientific content. But while we have made every effort to provide the most accurate and current information available, this is by no means a finished USDA publication. Use the information circumspectly. USDA and ARS do not warrant or guarantee the accuracy of the contents.

Suggested citation (adjust format to match the appropriate house style):
